

Garbage pickup

Pickup fee ¥500 JPY

The bag I gave you is for burnable trash.

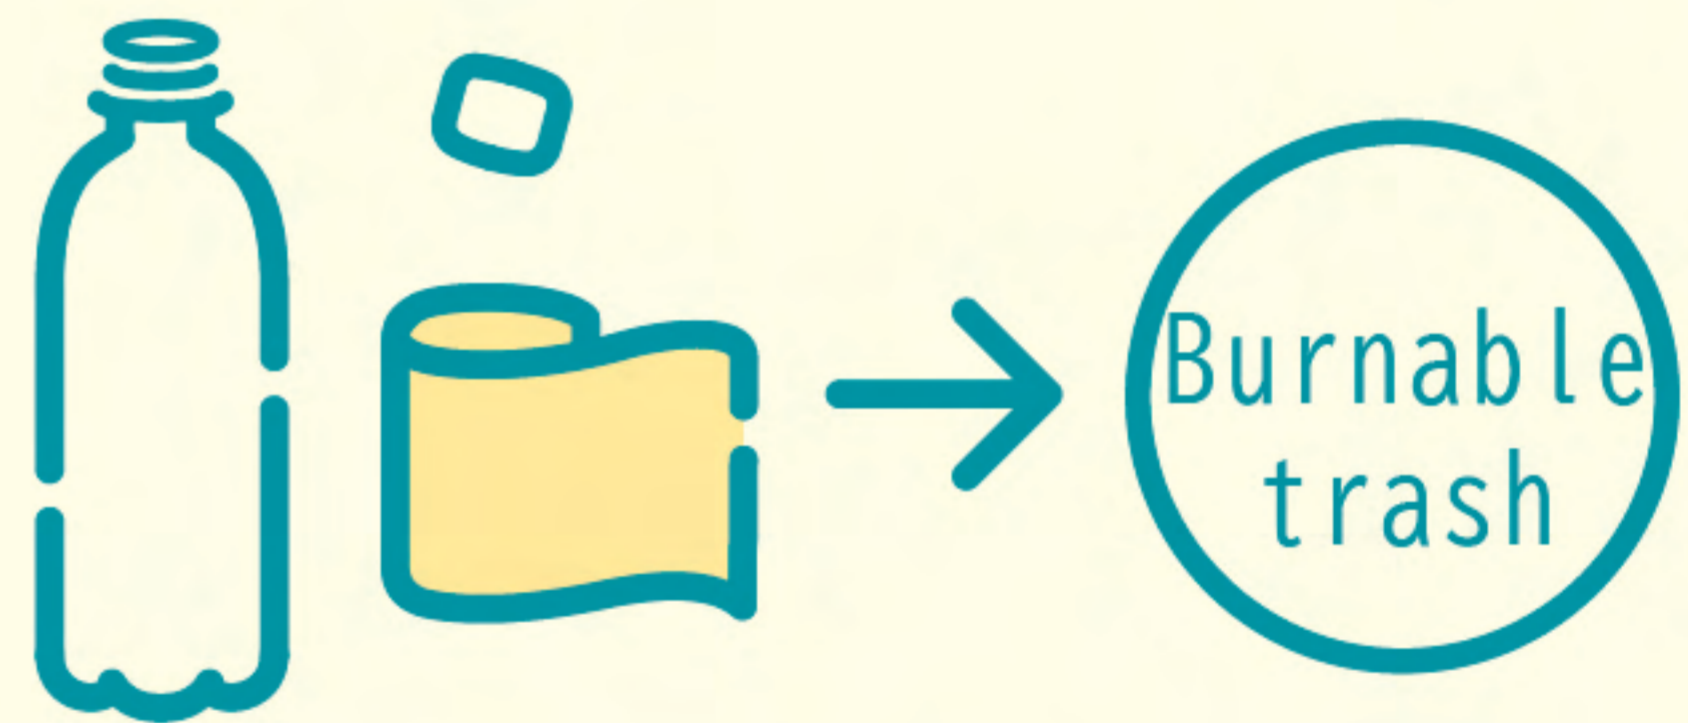

Please sort the trash and bring it to the management building.

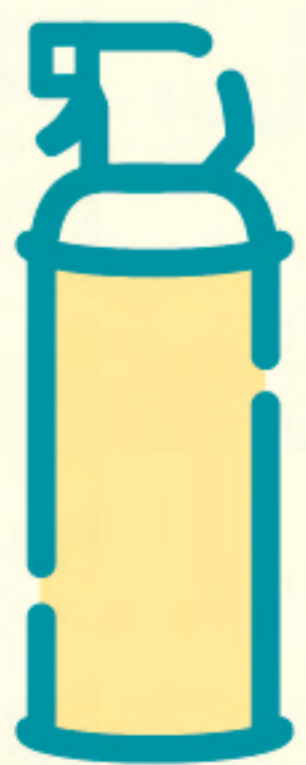

For non-burnable items, please bring cans, bottles, PET bottles, and spray cans in separate bags.

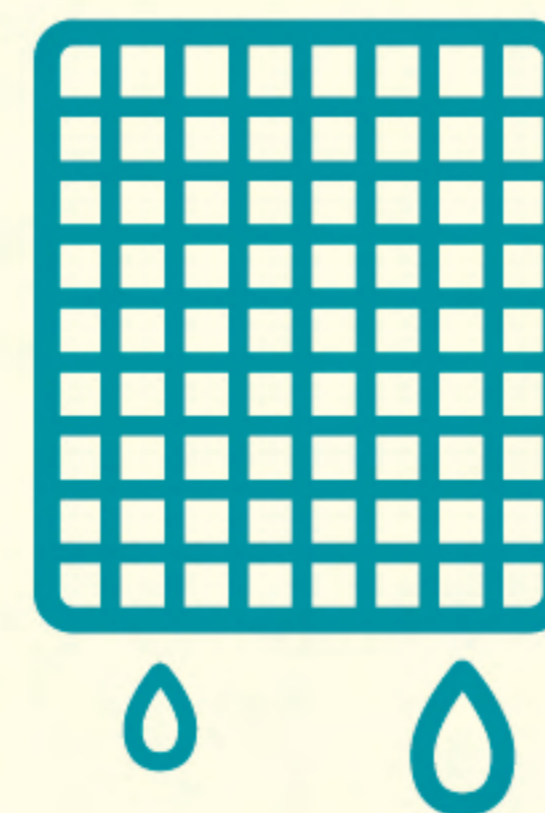

Please rinse and drain cans, bottles, and PET bottles, then crush them to reduce their size.

Remove the film and cap from PET bottles and discard as burnable trash.

Used spray cans must be punctured with the hole puncher at the management building to be collected.

Only clean, non-burnable items like nets can be collected.
